Offered by the Division

Major in liberal studies with the B.A. degree in applied arts and sciences.

The Majors

The liberal studies blended teacher education major and traditional liberal studies major are designed solely for students who intend to teach at the elementary level. The liberal studies major prepares individuals who are capable of thinking critically, analyzing evidence, and writing clearly and effectively. Graduates develop a rich understanding of the major subject areas – literature, history, mathematics, science, and the visual and performing arts – including how practitioners create and evaluate new knowledge. They learn to identify and understand the developmental stages of children and to observe, interview, and tutor children effectively in classroom settings.

The liberal studies blended and traditional majors are the only majors at SDSU designed to satisfy the Senate Bill 2042 requirements approved by the California Commission on Teacher Credentialing in September 2001. The content covered in the courses closely matches the content that teachers will ultimately have to teach in the schools as well as the content assessed by the California Subject Exam for Teacher-Multiple Subject (CSET-MS) exam.

The liberal studies blended teacher education major includes a special core of freshmen-sophomore courses: Teaching as a Profession, Introduction to Literacy, and Child and Adolescent Development from a Cultural Perspective. The traditional liberal studies major includes the following core courses: Introduction to Psychology, Developmental Psychology, and an additional history, philosophy, or religious studies course. The upper division requirements for both majors include a number of courses specifically designed for future elementary teachers including children's literature, linguistics, mathematics, inquiry-based science, early world and United States/California history for teachers, hands-on visual and performing arts courses, and child development.

Students in both majors complete a specialization, which consists of 12 units in a given discipline. In the new SB 2042 program, one course from the upper division major may be double counted in some specializations. See the specific requirements below. Specializations

focus on the major subject areas taught in the schools plus human development. Thus, graduates can help each other once they begin teaching.

For graduation, students must also complete a senior project, the liberal studies assessment portfolio. Students are introduced to the assessment portfolio during orientation. They begin a comparative study of the subject areas when they take Liberal Studies 300 during their junior year. They are introduced to the specific guidelines and begin writing the required essays the semester before submission when they take the 0.5 unit Liberal Studies 498 course. Students are strongly encouraged to save both syllabi and written work (exams, projects, and other materials) from all their courses. The professor's name must be written on each artifact that is submitted. As a requirement for the portfolio, seniors take the CSET subtest in the area of their specialization. The assessment portfolio serves as the summative assessment for the major. The portfolio challenges students to synthesize and think reflectively about what they are learning.

Advising is extremely important because students must make numerous decisions that include choosing appropriate courses, shaping the specialization, preparing the assessment portfolio, and planning for the credential program. See the Web site for current information, advising procedures, and e-mail questions. Information about SDSU credential programs and financial aid opportunities is available at the College of Education, Office of Advising and Recruitment, BA-259, (619) 594-6320. **Due to the "No Child Left Behind" federal legislation, students entering a credential program in California after July 1, 2004, will be required to pass the California Subject Examination for Teachers-Multiple Subjects (CSET-MS) prior to student teaching. For the SDSU regular and bilingual credential programs, students must complete the CSET prior to entering the program because student teaching begins in the first semester.**
