Offered by the Department
Master of Arts degree in philosophy.
Major in philosophy with the B.A. degree in liberal arts and sciences.
Minor in philosophy.

The Major
The philosophy major explores and seeks to understand values and
the nature of reality. Through the study of philosophy, questions
are asked about existence and experience: What is truth? What is
morally right? What kind of life is best? What kind of society? Is there
an ultimate reality? Philosophy studies the types of questions that most
other subject areas are unable to address fully.

There are three different ways these questions are characteristi-
cally investigated in the philosophy major at San Diego State
University. They are approached historically, by studying the history
of philosophy from the ancient Greeks to the present; analytically, by
carefully examining the meanings and interrelationships of ideas; and
critically, by training students in the art of evaluating various claims
and the arguments for and against them.

While the analytical and critical approach are part of every course
in philosophy, the philosophy curriculum at San Diego State University
emphasizes the historical approach. The aim is to provide the philoso-
phy major with a thorough grounding in the development of philoso-
phy so that the student is well prepared to participate in the discussion
of contemporary issues.

The education of a philosophy major, along with providing the sat-
isfaction of dealing with fundamental issues which have concerned
serious thinkers for many centuries, also provides the student with
skills that may be used in a variety of careers. Some students begin
graduate work after their B.A., either in philosophy, with the expecta-
tion of teaching or writing in the field, or in law, education, or other pro-
fessional programs. Some enter new fields of research, working on
computer problems or artificial intelligence. Other students find that
the special skills they have developed as philosophy majors - the
ability to read complex material with comprehension, to analyze
problems, to find relevant sources, to evaluate evidence, to propose
solutions and to examine them self-critically, and to report the results
of their inquiries with clarity and coherence - are valued by employers
in many different fields. Such students may find career opportunities in
government, industry, finance, and social services.

Advising
All College of Arts and Letters majors are urged to consult with their
department adviser as soon as possible; they are required to meet
with their department adviser within the first two semesters after decla-
ration or change of major.
